I create beautiful, responsive, and user-friendly web experiences using modern technologies like React and Decisions Low Code. Full stack trained, with a frontend-first eye for design. With 5 years of experience, I've developed start to finish full stack projects for brands, studying accessibility as a priority and ensuring every product is inclusive and polished.

Work Experience

Intermediate Developer
System Micro
September 2023 - December 2025 / Presently remote
- Designed and implemented product branding through graphic design and frontend web development.
- Acted as Product Manager for multiple software projects, scoping requirements, developing foundations, and ensuring the team delivers high-quality results.
- Independently implemented JavaScript web libraries into existing internal backend architecture allowing modern frontend development using ReactJS.
- Conducted in-depth live demos and compelling sales pitches to potential clients, showcasing the capabilities and benefits of our solutions.
- Mentored and supervised co-op students, providing guidance and support to enhance their technical skills and professional development.

Software Developer - AGILE Lead
Sagacity Software
December 2022 - June 2023 / London, ON
- Delivered complete software projects, contributing to a web based energy smart-metering platform for IoT devices using React JS and PHP.
- Developed customer facing utility usage reporting tools for data analysis using Python Pandas.
- Organised AGILE management by leading daily scrums, reviewing code and planning sprints.
- Onboarded and mentored co-op students, teaching foundational JavaScript and how to deliver software in a business environment.
- Took responsibility for the platforms frontend development, developing new features, maintenance and continuing communication between developers and clients standards.

Software Developer
Sagacity Software
December 2020 - December 2022 / London, ON
- Completed full stack development bug/feature tickets whilst working directly with senior developers. - Used Photoshop and Figma to create client facing graphics.
